#### Iltharanos [CARDASSIAN REPAIR FACILITY] July 26, 2012

# Mission

The Cardassian Repair Facility is used to create and repair new starships.

### **Features**

The Repair Facility is lightly armed and protected for a station of its size, roughly comparable to a Galorclass starship.

The true strength of the Repair Facility is its extensive docking, accommodating multiple Hideki-class starships (and later Jem'Hadar Attack Ships), as well as construction and repair facilities for several Galor or Keldon-class ships.

## Background

The Cardassian Union, throughout the 24<sup>th</sup> century, lacked the technological sophistication of the Federation and Romulans. To compensate for this lack, the Cardassians produced a large number of less-sophisticated, but easier to maintain and build starships. The numerous repair facilities scattered throughout Cardassian space were critical to this endeavor.
