## Mission

The Hutet is designed to be a mobile starbase, allowing the Cardassian Union to expand its influence without the need to construct expensive and time-consuming Nor starbases.

## Features

With its multiple Class 5 disruptor mounts, along with its single Class 6 disruptor mount, the Hutet has more firepower than even a Nor starbase. With the addition of multiple Mk 60 DF photon torpedo launchers, the Hutet is easily the single most powerful spaceframe in all of the Union.

Like all Cardassian starship designs, the Hutet features monotonium plating and spiral-wave disruptors.

Unlike other Cardassian starships, the Hutet is so large that its hangarbay can accommodate a dozen Hideki starships, which when released, make the Hutet a fleet of its own.

## Background

The Cardassians suffered a serious blow to their pride and prestige when the Klingons invaded their space and easily dismantled a significant percentage of the Union military. Cardassian Central Command's response was to develop the Hutet, but due to resource deficiencies and a lack of technical expertise, the program remained incomplete, with only a skeletal framework of a prototype to show after 14 months of intensive research and development. Only with Cardassia's entrance

into the Dominion, and access to the resulting higher technology, was the Hutet program completed. Even then, only a single Hutet-class battleship was produced, as the resources of the Dominion were targeted at producing more Jem'Hadar designs and Type-3 Galors.
