## Mission

The Epoch-class fighter is a front-line versatile design, among the best in the 29<sup>th</sup> century Federation's Timefleet.

## Background

The Epoch-class fighter was designed to supplement the Wells-class starships of the Federation Timefleet in their struggle to maintain the integrity of the prime timeline. Many in the Timefleet fear that a Temporal Cold War is in the making, risking the integrity of not just the prime timeline, but that of multiple alternate universes.

## Features

The Epoch is equipped with a standard Type B subatomic disruptor array, allowing the vessel to disassemble targets at the molecular level. While lightly armed by 29<sup>th</sup> century standards, this equipment makes the Epoch superior to the full armament of 24<sup>th</sup> century dreadnoughts. The Epoch's temporal shields protect it from changes in the timeline while its temporal sensors allow it to pinpoint with extreme accuracy the spatial and temporal coordinates of such a disruption. This small starship also comes equipped with a miniaturized hyper-impulse drive allowing extremely fast in-system travel.

The Epoch's most powerful feature is its temporal displacement drive. The ship's FTL drive creates a temporal field that enables the Epoch to appear instantaneously in great distances in space and time.
