Starfleet Drozana-class

Heavy Outpost; Commissioned: 2253

Hull Data

Structure: 35   [99 space][1 space remains]
Size/Decks: 7/75
Height/Diameter: 300/800 meters
Complement: 1,000 crew + 1,000 temporary visitors

Tactical Data

Phaser Banks: Type IV (x5/C)   [-15]
Penetration: 4/4/4/0/0
Torpedo Launchers: Mk 12 IF (x2/C)   [-4]
Penetration: 3/3/3/3/3
Deflector Shield: PFF 2a (B)   [-6]
Protection/Threshold: 13/3

Docking Data

Docking Bays: 2   [-4]
Shuttlecraft: 14 size worth
Docking Ports: No   [0]
Docked Starships: N/A
Docking Pylons/Berths: 3   [-9]
Docked Starships: 9 size worth (Size 7 max.)

Operational Data

Cargo Units: 120   [-10]
Life Support: Class 3 (D)   [-6]
Operations System: Class 3 (D)   [-6]
Sensor System: Class S3 (0/0/+1/+2/+3/D)   [-6]
Power System: Class 2R (CC)   [-11]
Sublight Drive: No   [0]
Orbital Correctors: SBT-2 (-1)   [-7]
Engineering Facilities: Class 3 (+3)   [-7]
Separation System: No   [0]
Tractor Beams: 1 u, 1 m, 1 d   [-2]
Transporters: 3 standard, 3 emergency, 3 cargo   [0]

Miscellaneous Data

Maneuver Modifiers: +2C, -6H, +2T
Traits: Hardened System (Life Support)   [-5]

Mission

The Drozana-class heavy outpost is designed as a more rugged frontier base than the older K-class outposts, specifically with contested border areas in mind.

Features

Vis-à-vis the older K-class, the Drozana-class possesses multiple and more powerful phaser banks, providing it with more firepower than even a Constitution-class starship. The Drozana also comes equipped with photon torpedo launchers, correcting the lack of long-range firepower of the older K-class outposts. Its PFF 2a deflector shields are top-of-the-line, providing a strong defense against all but the most powerful capital ships of hostile powers such as the Klingon Empire.

The interior of the station's docking pylons consists mainly of storage and industrial fabrication facilities. Large and well-furnished recreational and guest quarters are located in the central hub.

Background

The Drozana-class is a powerful outpost and prior to the introduction of the watchtower-class starbases was the primary space stations guarding the frontiers of Federation space. The Drozana fared significantly better than its predecessor, the K-class stations, and saw extensive deployment along the Klingon neutral zone. The station's primary drawback was the large number of crew required to man its many tactical systems.

Stations in Service

Name	Registry	Notes
Drozana	Drozana-01	Prototype and lead station of the line, constructed in the Donatu sector (2253).
Donatu	Drozana-07	Constructed in orbit of Donatu V, ten years after the conclusive battle fought there between the Federation and Klingon Empire (2255).

Appearances

Series	Media
