Mission

The Emissary-class is designated as an exploratory cruiser, but its primary function is to serve as a flagship for sector fleets.

Background

With the Klingons having withdrawn from the Khitomer Accords, the Emissary has been fielded as a ship capable of anchoring entire sector fleets and though its formidable offensive and defensive systems are more than capable of allowing it to operate on its own, it is nearly always

accompanied by a fleet of supporting starships, usually no less than two Vigilant-class heavy escorts, two Defiant-class heavy escorts, and an Avenger-class light explorer. If necessary, the ship can use its powerful warp engines to depart from insurmountable threats at speeds approaching 12,000c.

Features

The Emissary-class starship, named for Benjamin Sisko the Emissary of the Bajoran Prophets, is the product of a renewed time of conflict for the Federation. The Emissary has multiple redundant systems, allowing it to operate even after having sustained severe damage to its systems. Its power grid is so efficient that emergency rerouting of power is effortless and routine, rather than dangerous and difficult.
